

**Five Consecutive Years  
Baxter Named Again To Global Logistics & Supply Chain Strategies  
100 Great Supply Chain Partners**

*Customers Ecstatic With Baxter's Planning Tools and Services*

**Austin, Texas – July 21, 2008** – Baxter Planning Systems ([www.bybaxter.com](http://www.bybaxter.com)), the premier provider of aftermarket parts planning solutions, today announced that Global Logistics & Supply Chain Strategies Magazine, the premiere publication for executives at the highest levels of supply chain management, has recognized Baxter as one of its 100 Great Supply Chain Partners for 2008. This year marks the fifth consecutive year that Baxter's clients and industry members have vaulted the company to this elite status.

“This recognition is especially pleasing to me and all of us at Baxter Planning Systems,” said Greg Baxter, founder and CEO for Baxter Planning Systems. “Our customers trust us to add value to their service process and we continually strive to deliver over and above their expectations. It is rewarding to be recognized as a partner who has direct impact on our clients' bottom line.”

The *Global Logistics & Supply Chain Strategies* 100 Great Supply Chain Partners program is the result of a six-month poll in which the magazine asks logistics and supply chain professionals to nominate vendors and service providers whose technology, logistics, transportation or consulting solutions have made a significant impact on their company's efficiency, customer service and overall supply chain performance. “In 2008, we received more than 1,400 nominations from small and large companies representing scores of different industries on five continents,” said Brad Berger, group publisher for GLSCS. “Vendors of every conceivable type of supply chain activity were nominated - from very specialized technologies, to third-party logistics providers to highly specialized

transportation services. The 100 companies that received the most qualified nominations were selected for this year's list. The purpose of the list in this report is to recognize those vendors that have so impressed GLSCS readers that they deserved to be singled out and to be held up as examples for others in the industry. In one sense, it is an opportunity to thank those providers who have helped readers achieve better results, and to let the industry know who is making a genuine effort to be a supply chain partner—not just another vendor. On a higher plane, the commentary in the report is intended to emphasize which services, technology, expertise and support our entire industry needs for all of us to be more successful. Congratulations to Baxter Planning Systems for being selected a 2008 GL&SCS Great Supply Chain Partner.” Baxter was also one of 19 selections from this year's 100 to be further recognized with case studies highlighting exceptional messages from their nominations.
